

GREENS CLOSURES (WINTER) Nov 28 2025

Members are encouraged to view the NVLBC website, calendar of events, to see if there is a greens closure announcement. In addition to the website, two signs, stating “**CLOSED**” will be placed on the greens.

Where **prolonged** periods of snow, ice or freezing conditions exist, a closure notice on the NVLBC website, calendar of events will state, “**CLOSED UNTIL FURTHER NOTICE.**” There is to be no bowling when greens are 'closed until further notice' is in effect.

NVLBC permits bowling East/West during the winter months. The angle of the sun does not thaw the south edge of both the North and South green. Bowling will be permitted by avoiding rinks 1 and 16 if the walkways and other rinks are free of frost.

If there is no NVLBC website notice for the day, but it remains cold, there must be no bowling before 1:00 pm. This time allows the air temperature to rise and thaw the greens and walkways.

In an event where there is no closure announcement or no closed signage placed on the greens, care should still be taken as the greens and walkways may be slippery. When this occurs, we ask that you not bowl under these conditions, but await for the temperature to rise and thaw the greens and walkways.

Remember safety is everyone’s business
